

Hon. Philip Snowden Takes Firm Stand On Reparations Question

The Hague—Dendok again began to threaten the vexed question of reparations. Great Britain is in a position to oppose the Young plan evolved at the recent conference of experts in Paris, and France, Italy and Belgium seem equally determined to oppose any change in the scheme.

Night Hon. Philip Snowden, chairman of the exchequer, outlined the British position and said his country had sacrificed its own interests to the utmost limits and would yield no further. Mr. Snowden made his statement before the financial committee of the House of Commons. The House, gathered to consider the Young plan.

While he hoped the other delegates would not regard it as a threat, Mr. Snowden said to reply whatever had been given to any of his arguments and none of his figures had been challenged.

The British Government, he said, did not accept the view that the plan was "indivisible" and that there would be no need for a conference. Great Britain, he declared, would not accept the shares in the reparations annuities accepted by the committee of experts, as he would not consent to the division of annuities into conditional and unconditional parts, and would not approve of continued deliveries in kind.

Mr. Snowden did not consider it a sacrifice on the part of France to give up something she would never have received. If sacrifices were to be talked about, he would have something to say about Great Britain's sacrifices.

Not a single country had made anything approaching the sacrifice made by Great Britain, he continued, but the British had never complained. Great Britain could not be made to sacrifice any of her material interests had been endangered but to support treaty rights in defence of world security. She willingly did that, willingly sacrificed her blood not in her own interests.

No country had done which, now amounted to \$37,500,000,000 or more than double that of any other nation in the war. Each country had contributed to the United States, Great Britain's war debt was \$32,500,000,000. At the end of the war, the Allies owed Great Britain \$10,000,000,000, which France owed \$2,000,000,000 and Great Britain claimed only \$1,125,000,000 from the United States. The United States had paid \$2,525,000,000 and Great Britain only claimed \$300,000,000, but the Young plan reduced this to \$200,000,000.

The British taxpayer would be burdened for the next sixty years with the annual payment of \$300,000,000. The Young plan, Mr. Snowden argued, had no right to interfere with the 8 1/2 per cent. Mr. Snowden emphasized his stand that the British delegation must have a decision on the points raised before the committee could proceed any further or discuss any other matters.

"I have behind me the unanimous support of my government," he added, "and of the House of Commons, irrespective of party, and I believe, of all the people of Great Britain. I speak quite frankly when I say we cannot compromise on the matter. The House of Commons would never ratify the Young report in its present form."

Fatal Ship Returning

Ottawa.—The Canadian patrol ship "Boothby," has reached the northern apex of the Young voyage with the Department of Interior's 1920 expansion. She reached Pelly Peninsula, Ellesmere Island, the most northern police post and post office, on August 3, and is now heading south, bringing out Inspector A. H. Joy, of the Canadian Mounted Police, who recently completed a northward patrol of 1,800 miles.

Willing To Leave Rhineland

London, England.—The Exchange Telegraph Company said it had learned on good authority British delegates to The Hague conference had made it clear to France and Germany, that in the event of their coming to an agreement between themselves on evacuating the Rhineland, Great Britain would accept such an agreement unconditionally.

British Airship May Be Zeppelin's Rival

Hops Machines Nearing Completion Will Be Much Larger

London, Eng.—Called reports from Lakehurst that the Graf Zeppelin's successful trip to America probably would be followed by establishment of a regular trans-Atlantic air line brought considerable speculation in London morning papers as to the possibility of British competition.

Greater speed or at least a cut in elapsed time of the trip was held to be the key to success of such a line and the hope was expressed that two British giants now nearing completion, the R-100 and R-101 would prove much faster.

Sir Dennis Burney, M.P., head of the company which built the R-100, in a talk with the Daily News expressed the view that the Graf's time did not give margin enough over fast steamers and an airship to be successful must be able to do a trip in sixty hours outward and 48 returning. This would imply a cruising speed of 80 miles an hour.

Resignation of Grain Board

New Members Will Be Appointed At An Early Meeting

Ottawa.—All the members of the board of Grain Commissioners for Canada have resigned, their resignations to take effect August 15. On that date the names of the new commissioners will be given out.

Announcement of the resignation of the members of the grain commission was made by Hon. James Macleod, Minister of Trade and Commerce, at the close of a cabinet sitting here.

The Macleod said that the new commission would make its own selections for the posts of assistant commissioners after it was appointed.

The resigning members of the grain commission are: Chief Commissioner L. H. Boyd, K.C., and Commissioners Matthew Snow and James Robinson.

The new board will also consist of three commissioners, but four assistant commissioners will also be appointed.

New Administration Has Assumed Office

Took Oath Before Premier S. F. Toile At Victoria

Victoria, B.C.—The Hon. Alexander Angus, P.C., Chief Justice of Canada became administrator of the Dominion of Canada when Premier S. F. Toile, of British Columbia, here, following the investiture, His Excellency issued a proclamation appointing him as administrator of the Dominion of Canada. A second proclamation appointed Hon. Mr. Justice P. B. Maguire, of Montreal, as deputy administrator, invested with authority to sign documents of various character.

New Manitoba Industry

Plant To Manufacture Explosives May Be Built Soon

Winnipeg.—The Manitoba Free Press publishes the following: "Rapid development of mines in northern Manitoba has led Canadian explosives division of Canadian Industries Limited, to purchase approximately 1,000 acres of land in the vicinity of St. Selkirk, 18 miles north of Winnipeg, upon which to erect an explosives plant. The enterprise involves an investment of approximately \$750,000."

"Date of construction of the plant is contingent upon mining developments, but it is expected that work will be completed by the end of 1930."

Drops Freedom Of Sea Issue

Toronto.—A special dispatch to the Mail and Empire from Washington says: President Hoover has dropped the freedom of seas issue out of his disarmament program, not only on the theory that it does not jibe with the Kellogg and Locarno treaties but because he believes naval war with Great Britain is the only real guarantee of freedom of the seas.

British Atlantic Fleet

Now Fighting the Greatest Single Fighting Force In the World

London, Eng.—The Atlantic fleet becomes the greatest single fighting force in the world by the decision of the Admiralty to recall 123 battle ships of the Queen Elizabeth class from Mediterranean waters to home waters and the Atlantic fleet.

The transference of the battle ships, not only an important change in distribution of the navy, but, as the new departure, in the British naval policy, means the balance of power is removed from Malta and Gibraltar to the Atlantic.

The Atlantic fleet will consist of 14 capital ships, among them the two most powerful vessels in the world, the Rodney and Nelson, and the largest battle cruiser in the world, H.M.S. Hood.

The Queen Elizabeth vessels are approximately 10,000 tons, armed with eight 15-inch guns. These five will join the two Nelson class vessels, the Hood, the four Iron Duke battle ships and the battle cruisers, Renown and Repulse, to make the most formidable fleet assembled on peacetime duties in the world.

PER CAPITA SALE OF LIQUOR IS IN EXCESS OF \$10

Ottawa, Ont.—Liquor sales in 1928 through provincial government stores totaled \$107,094,384—rather more than \$10 per capita over each Canadian.

Figures on the liquor traffic in Canada, covering sales in eight of the nine provinces, were released by the Dominion Bureau of Statistics, government control is in the hands of the provinces excepting Prince Edward Island and Nova Scotia.

Total government revenue from the liquor traffic during 1928 amounted to \$2,560,501.

Of this amount, \$49,805,291 rolled into Dominion coffers, while the remainder of \$2,510,696 accrued to the provinces. Actually, the latter figure does not include all profits of liquor control boards.

Less than one-third of Saskatchewan's total liquor board revenue appears under ordinary revenue, while more than \$400,000 distributed to municipalities does not show in British Columbia's.

Ontario and Quebec receive by far the highest revenue totals among the provinces, their combined total aggregating two-thirds of the Dominion's aggregate Ontario revenue amounted to \$8,130,390, and Alberta with \$2,765,000, and British Columbia with \$2,702,228.

Less than one-third of Saskatchewan's total liquor board revenue appears under ordinary revenue, while more than \$400,000 distributed to municipalities does not show in British Columbia's.

Ontario and Quebec receive by far the highest revenue totals among the provinces, their combined total aggregating two-thirds of the Dominion's aggregate Ontario revenue amounted to \$8,130,390, and Alberta with \$2,765,000, and British Columbia with \$2,702,228.

Seven provinces are represented in the figures of gross sales reported by provincial liquor control boards: Prince Edward Island and Nova Scotia being omitted. Ontario's total is double that of the next highest, Quebec, amounting to \$48,960,591 of the Dominion aggregate of \$107,094,384.

Quebec is next with \$24,229,624, British Columbia and Saskatchewan are the only other provinces which grossed more than \$10,000,000, the former reporting \$13,856,619 and the latter \$11,708,534.

WON HONORS AT BISLEY MEET

Winnipeg, Man.—Going to the Pacific coast on a transcontinental tour, Captain J. H. Parkinson, noted Canadian pilot of Montreal, Que., left Montreal, July 12, and has made 12 stops at various eastern cities. His route to the Pacific coast, the Montreal aviator will visit various prairie cities.

POPULAR FIGURE IN LONDON SOCIETY

Wife of the Duke of Devonshire

London, Eng.—The Duke of Devonshire's wife, the Duchess of Devonshire, is a popular figure in London society. She is the wife of the Duke of Devonshire, who is a member of the House of Lords.

The Duchess of Devonshire is a popular figure in London society. She is the wife of the Duke of Devonshire, who is a member of the House of Lords.

The "I'm Alone" Case

Eminent Counsel For Canada and United States To Act As Arbitrators

Ottawa.—Canada has elected Eugene Lafleur, D.C.I., LL.D., K.C., eminent counsel of Montreal, as Canadian arbitrator in "I'm Alone" case. The government of the United States has appointed Willis Van Devanter, associate justice of the Supreme Court of the United States, as its arbitrator.

Announcement of the selections was made simultaneously in Ottawa and Washington.

At the same time the Department of External Affairs at Ottawa, announced that John R. Hood, K.C., of the Nova Scotia bar, was legal adviser of the department, had been appointed Canadian agent in the case.

Counsel for the Dominion of Canada in the case are W. N. Tilley, K.C., of Toronto, and Anne Gifford, K.C., of Montreal.

At the Department of External Affairs it was announced recently that there would possibly be a lapse of some time before the arbitrators in this famous case actually open sittings. Counsel for both parties will have to get to work on the case and there must be an exchange of pleadings, which may occupy considerable time.

Not until the preliminaries have been disposed of will there be a definite decision as to the place or places where sittings will be held. It has been taken for granted that some of the sittings at least will be held in Washington, but there is a possibility that there will be others, possibly some in Ottawa.

Plan New Air Route

Chicago To Flight Sound Via West Coast Cities

Chicago, Ill.—Chicago will be brought to within 22 to 23 hours of flight sound cities along the northwest by a new all-air passenger route, said L. H. Britten, general manager of Northwest Airways, announced here. Britten said an agreement has been reached with Western Canada Airways, Ltd., which plans to operate along the southern Canadian border from Winnipeg to Banff and Victoria, whereby Northwest Airways will extend its line to Winnipeg and make connections with the Canadian company.

Noted Aviator Visits West

Winnipeg, Man.—Going to the Pacific coast on a transcontinental tour, Captain J. H. Parkinson, noted Canadian pilot of Montreal, Que., left Montreal, July 12, and has made 12 stops at various eastern cities. His route to the Pacific coast, the Montreal aviator will visit various prairie cities.

Canadian Authoress Dead

Native Of Winnipeg Well Known To Public Five Years Ago

Chicago, Ill.—Mary MacLane, a successful author 15 years ago, died August 6, in a lonely room on the fringe of Chicago's black and tan belt. She was born in Winnipeg, Man., in 1881.

"Men Who Have Made Love To Me," and other romantic writings, Miss MacLane had written and published. It was some time after her death before it was realized that she was the Mary MacLane whose own romantic adventures as set forth in her books had stirred the imaginations of the reading public of a few years ago. No one was at her bedside as she died. Her body was taken by the proprietor of the small hotel where she had lived for the last four years. Her death, a doctor's certificate said, was due to natural causes.

Miss MacLane's retirement about six years ago was believed to have been caused by disappointment. It came after the sale of her new books "The Confessions of Mary MacLane" and "The Confessions of Mary MacLane."

At the conclusion of the meeting, the President of the Anglo-Egyptian Draft Treaty, said: "Since United States have become active themselves in preventing liquor smuggling, it seems appropriate that the United States should be considered by the Canadian Government." The prime minister indicated there might be an announcement in a few days of new regulations in the way of co-operation in suppressing the traffic.

To Halt Liquor Smuggling

Federal Government To Co-Operate With U.S. In This Connection

Ottawa.—The Dominion Government is studying ways by which it can more effectively co-operate with the United States in the suppression of liquor smuggling across the border. The question was again brought before the cabinet at a recent session.

At the conclusion of the meeting, the President of the Anglo-Egyptian Draft Treaty, said: "Since United States have become active themselves in preventing liquor smuggling, it seems appropriate that the United States should be considered by the Canadian Government." The prime minister indicated there might be an announcement in a few days of new regulations in the way of co-operation in suppressing the traffic.

At the Department of External Affairs it was announced recently that there would possibly be a lapse of some time before the arbitrators in this famous case actually open sittings. ANGLO-EGYPTIAN DRAFT TREATY WELL RECEIVED

London, Eng. British military officers of Egypt, except for the

London, Eng.—British military officers of Egypt, except for the Suez Canal zone, are abandoned and other important and far-reaching agreements agreed to in the new Anglo-Egyptian draft treaty, details of which were issued from Downing Street by the foreign office.

The proposals are a great advance on anything hitherto offered as settlement of the Anglo-Egyptian dispute, being considered even more favorable than was the draft treaty of 1927, which was rejected by the Egyptian Parliament under the influence of the followers of the Nationalist leader Zaghal Pasha. The agreement, which was signed by Henderson, foreign secretary, has been negotiated with the Egyptian Premier, Mohammed Pasha Mahdoud, in a general way, and the lines of the draft treaty have been agreed to.

The British occupation will cease and British troops will be withdrawn to the Suez Canal zone. The Egyptian government will use its influence to induce other powers to consent to the abolition of the capitulations of extrajurisdictional rights and will assist Egypt to become a member of the League of Nations.

Further, Great Britain regarded the protection of foreigners in Egypt is a matter involving solely upon the Egyptian government. The Egyptian government will be the "reserved" points of the Egyptian Government two years ago, but it is now admitted that this will be exclusively the concern of the Egyptian government.

The variations of 1927 will give Egypt a greater measure of real independence rather than ever before proposed.

The most important concession on Great Britain's part is the withdrawal of British garrisons to the canal zone. This was refused in the negotiations with Sarwat Pasha two years ago. Sir Austen Chamberlain, then secretary of state for foreign affairs, held out this as a possibility ten years hence.

His Majesty's note to Prime Minister Mahdoud, stipulates that these new proposals must first be approved by the newly elected Egyptian Parliament before they are submitted to the British Parliament for approval and embodied in a treaty.

Eligibility Of Women For The Senate To Be Decided By Privy Council

Seeking Wider Markets

British Guiana Wants More Business With Canadian People

Ottawa, Ont.—British Guiana is seeking wider markets in Canada for its products. Hon. J. D. Nash, director of agriculture in that country, has been in Ottawa to confer with officials in various government departments.

The primary part of his visit, he said, was to stimulate interest in commodities which British Guiana can supply. Later, on proposals may be laid before the Canadian government in the direction of new trade preferences.

Sugar, rice, coffee and coconuts are the products for which Mr. Nash hopes to create a greater demand here. This year has seen record crops in British Guiana, he said, and increased purchases of fruit and farm machinery from Canada.

Railroad May Be Sold

British Columbia Likely To Get Rid Of Pacific Great Eastern

Victoria, B.C.—The Pacific Great Eastern road may be expected to be removed from the people of this province within a very short time. Hon. R. P. Toole, attorney-general, said, speaking at the Equinox Conservative picnic at Saanichton, B.C., that the government is considering the sale of the Pacific Great Eastern road.

Soviet Plane Starts Flight

Has Left Moscow For New York Via Siberia and Alaska

London, England.—An Exchange Telegraph Company dispatch from Berlin said the Soviet aeroplane "Land of the Soviets" with a crew of five, left Moscow on a trip to New York by way of Siberia and Alaska.

The plane, a biplane, is a 1910 model. It was built by members of the Aviation and Chemical Society. The route for the flight covers about 12,000 miles, roughly across Siberia, the Aleutian Islands, Alaska, Seattle, San Francisco and Chicago.

The Northern Pacific section of their itinerary has been flown twice before, once by English aviators, one of whom met disaster, and again in 1924 by the United States Army world fliers, when one of the four planes had to turn back before reaching Japan.

Some Dog
They were discussing dogs, and the tales were becoming "pretty tall" when one of the group took the lead. "Smith," he said "had a most intelligent retriever. - But right Smith's house caught fire. All was instant confusion. Old Smith and wife flew for the children and banded out with them in great haste. "Alas," one of them had been left behind. But up jumped the dog, rushed into the house, and soon reappeared with the missing child. Everyone was saved, but never dashed through the flames again. "What did the dog want? No one knew. Presently the noble animal reappeared, scratched and barked, with what do you think?" "Give it up," cried the sage listener. "With the fire insurance policy, wrapped in a damp towel, gentle man."

\$2.50 in the United States

In some eastern cities people are wearing pajamas during hot weather, but nobody has had the nerve to appear in an old fashioned night shirt.

The small boys in Brussels rejoiced when the city authorities declared balls taboo because of water shortage.

STUTTERING MONEY

People say "money talks." In Germany they go one better and say it "stutters" when paid out on the installment plan. The exact German word for it is "stottern," which is to be given recognition in the dictionary as meaning to stutter, or to buy on installments.

The United States is a country of many slang words and expressions, but the Americans have now a rival in Germany who originated this most apt and descriptive term for money paid out on the installment plan.

GOOD FARMING

In this year of light rainfall, and small crops the value of farming by sound, scientific, proven methods is plainly evident. Crop reports from many districts are summarized in a few words: "Without snow on summer fallow or breaking will yield a fair crop. Stubbled in crops will be very light, and some are not worth cutting."

These reports show the infinite superiority of the summer fallow system over the stubbling in method. This year when snow on summer fallow is a prolific crop, while that which was stubbled in is, in many cases, a total failure, or at best, a very light yield.

Farming experience in the Bassano area, where year of light rainfall are not uncommon, has proven that the summer fallow method is the most profitable for wheat growing. Grain growers of the Bassano district are farming according to tried and proven methods as is seen in a survey of the crops here, for less than fifteen per cent of the 1929 crop was sown on stubble land.

ON RAIN MAKING

The dry summer of 1929 recalls a similar dry season some years ago, when lack of rainfall was the cause of very poor crops in the Medicine Hat district and farmers, in desperation, turned to Hatfield, the rain-maker. Next spring Hatfield created a to-do and began his mysterious rain-making operations near Medicine Hat after making an agreement with the farmers that he would be paid a certain sum of money for a certain amount of precipitation. Hatfield was lucky. Jupiter Pluvius frequently visited the Medicine Hat district that summer, and the rainfall was greater than it had been for a number of years. Hatfield collected a large sum of money from the public farmers, packed up his chemical vials and left, never to return.

From this humerous man has come to make rain and ensure an abundant harvest. In the early days of the human race the witch doctor or high priest mattered vivid imaginations from a hilltop in an endeavor to arouse the anger of the gods and beseech of them rain and good crops and cool hunting for the starving tribes. And the witch doctor probably got on good results as Hatfield.

Later, explosives were used in an attempt to shatter the clouds, but

without result, and even all the explosives used in the great war failed to alter the course of nature. Quite recently another attempt at rain-making was made by the use of airplanes and chemicals. This was more successful than previous attempts, but the results were negligible, so it may be counted as another failure. Nature's method of making rain is: first, the moisture rises from the earth's surface in the form of vapor and gathers in clouds when the cloud is cooled to a certain temperature the vapor condenses and falls as rain. The process requires millions of horse power. So far, man has been unable to develop and apply that power for the making of rain.

Welcome Tears

They were talking about women friends. "Do you see Emma often?" one enquired. "Oh, yes, quite frequently," the other replied. "Is she happily married?" "Is she? I should say so. Why, that girl is so happily married that she has to go to the 'bakery' for a good cry."

The New CHEVROLET Utility 1 1/2 Ton TRUCK

The illustration shows the Utility 1 1/2-ton truck equipped with combination body.

The Six Does Better What the Four did Well

TO the well-known Chevrolet qualities of stamina, dependability and economy, the new Chevrolet Truck adds the further advantages of smooth, six-cylinder operation... extra-rugged chassis construction... the superb speed and pulling power of a newly-designed four-speed transmission... ball-bearing steering mechanism... new, four-wheel brakes that are sure and positive in action. Although it is a better truck, a sturdier truck, a truck that gives true six-cylinder performance... this new Chevrolet Utility Truck (with its 1 1/2-ton capacity) is still offered within the price-range of the four.

Ask for a complete performance and maintenance record of this amazing truck... and learn how it can save money for you. C115-1116 PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

IT'S BETTER BECAUSE IT'S CANADIAN

The Only Drawback
Mrs. Briggs: "How be your June doing, now she's married?"

Mrs. Gifford: "Oh, she's doing fine; she's got the prettiest little cottage with a garden, and some lovely furniture, four pigs, two cows, an' some chickens. The only thing is, she can't abide her man, but then, there's alius summer!"

No Hough Stuff
Small Sister: "Let's play that we are married."

Small Brother: "Now let's play football and then we won't get bunged up so much."

W. H. P. writes: "A batch of jokes sent to the editor were rejected as so good, but when I put them in the above the few just roared."

Local News

Mr. and Mrs. H. J. Bell, of Hinton, were visitors to Bassano on Monday.

H. J. Angell left Wednesday night to join the family on a vacation in Vancouver.

Miss Irene Johnston is spending a vacation at Bass.

Dr. Simmons, of Gleichen, was a visitor in Bassano on Wednesday.

The exterior woodwork on the post office received a coat of paint this week.

Work is progressing on McKee's new new's wear department which he expects to have ready by Sept. 1st.

Dr. A. Q. Scott, Robt. McLean, H. O. Bredin and W. E. Sambrooke motored to Calgary Tuesday night.

Miss Lois Harrison, of Stettler, is visiting with her sister, Miss Lucile Harrison.

H. Haynes, Mrs. H. Haynes and Miss Katherine Hunter motored to Banff and Lake Louise last weekend.

The bank inspectors visited the local branch of the Canadian Bank of Commerce early this week.

Mr. and Mrs. A. H. Maurer and Donald returned Wednesday from a motor trip through the central states.

Mr. and Mrs. W. King and Mrs. Mason spent a few days last week in Calgary.

Mr. and Mrs. Jack Allen and Quentin returned home over the week-end after spending two weeks in the mountains.

Mr. and Mrs. Dan Morrison, of Shepard, were visiting friends and relatives in Bassano over the week-end.

Mr. and Mrs. Fred House, of Hagersville, Ontario, motored up to Bassano and were the guests of Mr. and Mrs. S. Leonard for a few days.

Mrs. S. C. French and Pamela returned home Wednesday evening after spending a vacation at Vancouver.

W. C. Reesor, manager of Currie & Milroy Ltd., hardware store at Hussar, was a business visitor in Bassano last Monday.

Mr. and Mrs. E. A. Beck and children and Mr. and Mrs. H. W. Ford and children returned home early in the week after spending a week's vacation at Waterton Lake.

Wednesday afternoon of this week was the last half holiday of the year. Starting next week stores will remain open until 6:30 p.m. Wednesday afternoons.

School Inspector J. P. Boyce went to Cessford and Pollockville, north of the Red Deer river, on Wednesday on business in connection with the department of education.

Daniel Christian Hennrich, a Danish youth 18 years of age, died in the Bassano Hospital on Sunday, August 11th. He had been in the district little more than two weeks, and in Canada less than three months.

"The Alberta Wheat Pool Expects Every Pool Member Will Do His Duty"

IF AT ALL POSSIBLE

Deliver All Pool Wheat To Pool Elevators

Pool elevators can handle Ninety Per Cent of all Pool Wheat.

With a short crop this year it is imperative that Pool elevators should handle as much grain as possible.

Pool members' safety and the protection of the Six Million Dollars invested in Pool facilities demands that every possible bushel of Pool wheat that can be delivered to a Pool elevator should go there.

Two cents a bushel farm storage will be paid on all Pool wheat held on farms until December 2nd, 1929.

Profitable Evening

"Who's the about-minded one now?" said the professor as they left the church one rainy night. "You left your umbrella back there."

"And I not only remembered mine, but I brought yours too." And he produced them from his coat. His wife gazed blankly at him. "But," said she, "neither of us brought one to church."

The old guide knows that careless hunters cause many forest fires resulting in the destruction of excellent hunting grounds as well as valuable timber. The good hunter is careful with fire in the woods.

THE FORD CAR FUEL SYSTEM

- A—Filler C. n.
- B—Filter spout screen filters gas and prevents splashing through filler opening.
- C—Gas gauge.
- D—Fuel line main shut off valve.
- E—Gas filter.
- F—Carburetor Connection.

Simple—Safe—and Dependable

THE Ford car fuel system is simple because it is direct. Gravity flow does away with forced feed. A short feed line with a minimum of elbows and connections is easy to service and eliminates approximately 100 parts required by the vacuum tank or fuel pump system.

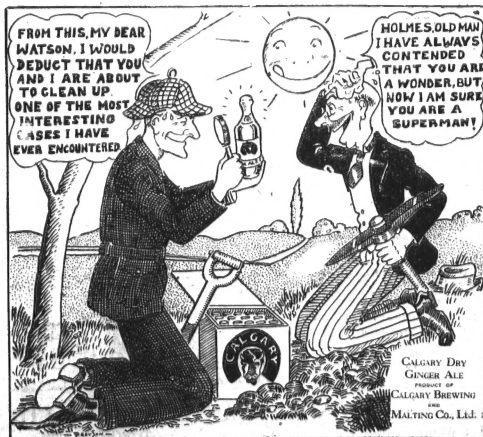

The nine gallon tank is so placed that it is well protected from front or rear end collision. Any overflow runs off on the ground with no serious results, since the only point of possible spark contact is the rear end of the exhaust. Three screens instead of one, as in most fuel systems, prevent foreign matter reaching the tank. A solid steel dash separates the Ford gas tank from the engine.

The gas gauge on the dash of the Ford car is controlled by a simple float as shown in diagram, being more direct, simple and accurate than any other type. Another point of driving convenience made possible by the gravity flow system is the ease with which the tank may be filled, while the driver supervises the operation without moving from behind the wheel.

Arrange for your demonstration ride with the nearest Ford dealer

WORLD HAPPENINGS
BRIEFLY TOLD

Two Canadian girls, each 15 years of age, led the 1,600 candidates graduating as Bachelors in letters from the Sorbonne, Paris, France, it has been announced.

An amateur astronomer named Forbes, at Henderson, B.C., has discovered a new comet. Photographs taken, it is reported, confirm its presence.

Karl Auer, Frieherr von Welsbach, inventor of the incandescent gas mantle, died recently at his residence at Welsbach Castle, in Carinthia, Austria, was also the inventor of Auer gas lamps and osmium lamps.

The recently proposed flight from Saskatoon to London, England, by the new northern route is being postponed until next June, according to Ben Brodman, of Winnipeg, who is organizer of the venture.

The Prince of Wales received Lieut-Col. R. M. Blair, Commanding Officer of the Southern Highlands, Vancouver, B.C., at St. James's Palace, and congratulated him on his success in winning the King's prize at the recent meet of the National Rifle Association at Blythe.

The name of Wm. Birks, of Montreal, president of the Canadian Chamber of Commerce, has been added to the list of those who will represent Canada at the Kyoto, Japan, conference of the Institute of Pacific Relations. The conference is to be held in October.

The London Daily News says that it learns that the Royal family is somewhat anxious about the health of Prince George, youngest son of the King. The Prince left the navy because of his health and went to the Foreign Office. This was said not to have benefited him, but rather to have caused his present indisposition.

The Canadian boys who won the International Jamboree are extremely well pleased at a gift of a token pole from Lord Baden-Powell. The carving on the token pole represents a red Indian and a beaver together, with a snake intertwining the pole. On the rear are the words "Friendship Jamboree, 1929, B.R.I."

Has Taken Proper Course

Ottawa Magistrate Cancels Drunken Driver's License For Two Years

Magistrate Howell, of Ottawa, in disposing of a recent case, in which a drunken driver had been involved in an accident, ruled that the offender's driving license should be cancelled for two years.

Sentence of that sort would do much to improve conditions on the highways, and it would be well if other magistrates were to follow the example set by the Ottawa court.

If the knowledge that conviction for drunkenness while driving means the loss of the right to have an automobile for several years becomes general, it is to be imagined that most people will be afraid to take a chance of drinking while they are out attempting to drink and drive deserve scanty consideration.

If they are reckless or obstinate enough to ignore both the law and the possibility of accidents, there is one logical course for the authorities, and that is to chase them away from the wheel of a car.

Magistrate Howell, of Ottawa, has shown what can be done, and if his policy is adopted in other courts the problem of the drunken driver will be well on its way to solution.—Peterborough Examiner.

Host: "Just another we draple after ye gang awa' Sandy."

Guest: "No, no, said Sandy, 'I tak ma' made I'm in a new house, and I'm not well acquainted w' the stair."

It is the business of a business man to see that his employees attend to his business.

"Why are you crying?"

"My sister has whisked and I can't go to school."

"But that is not very bad."

"But teacher says she'll be better tomorrow."—Lustig, Bluffard, B.C.

Guards Against Gas Explosion

New Invention Works Against Mined and Pans Away Fumes

After the numerous gas explosions which have occurred recently in London, it was only to be expected that something would be invented to make this possibility of explosion a thing of the past. And now we hear of a little device which does away with any danger of gas explosions.

This wonderful little invention is not very impressive to look at, being just a little cylinder shaped, instrument only about seven inches high, which can be fitted wherever there is a possibility of leaking but it gets the very minute escape to set this gallant little sentinel in action, when it works a danger signal, gets in touch with the nearest telephone exchange, and informs those in power of the exact locality of the escape.

Not content with this warning, the trustworthy little cylinder sets in motion an electric fan to keep away the fumes!

What more can one ask?

Edison Competition

Boy From Washington State Is Selected To Play Role In Foot-slops Of Invention

Wilbur B. Huston, a youth from Port Madison, Wash., was named the winner of the Thomas A. Edison competition for choice of a prize and follower in the footsteps of the inventor.

The forty-six contestants—one from each state and the District of Columbia—were lined up on the lawn of the Edison house in Llewellyn Park at the announcement made by Dr. S. W. Stratton, president of the Massachusetts Institute of Technology, who was chairman of the committee of judges.

Dr. Stratton was high in his praise of the boys, who participated in a grueling examination on subjects ranging from morals and ethics to science.

Winnipeg Newspaper Union

Use Canadian Hat

King George Gifts Hats To Soldiers Erected By Ex-Servicemen

Those Canadian ex-servicemen who were stationed in the vicinity of Windsor Castle, during the war, and who were responsible for the erection of the Canadian flag on the edge of the castle grounds, learn with satisfaction of the fact that they have been given a hat by the king.

The hat, which is of the same design as the one worn by the king, is a reminder of their stay in the district. The idea was approved and the necessary timber placed at their disposal in the forest.

Today the king is using the hat in his recreation, but Princess Elizabeth has taken possession of it. It is to be given to the soldier who has the most beautiful hat in the district.

There are 58,850 pennies in those bags. Jacobs said in explanation, "and if you don't believe me, I could show you the bags. I have them for four years and I said I'd ever get enough of them together I'd buy one of your cars."

There were 58,850 pennies in those bags, so Jacobs drove away in the car.

Recipes For This Week

(By Betty Barclay)

SHEPHERD'S PIE

On a well-buttered pan place pounds of left-over meat, potato, which has been mixed with milk to right consistency; cut left-over meat or fish into small pieces, combine with eggs, and mix with cream and sauce 12 cups milk, 4 tablespoons butter, 4 tablespoons flour.

If there is any left-over gravy, mix with the meat and add to the consistency. Add 2 cups left-over meat or fish. Onion, green pepper or pimento may be added for better flavor. Pour around the middle of mashed potato. Bake in a moderate oven until well browned. Garnish with parsley. If desired, the dish may be lined with potato and filled with creamed mixture.

Voyage To The Antarctic

Famous Vessel Of Capt. Scott, "The Discovery," Starts South Again

Equipped with the latest gear, the good ship "Discovery," famous vessel of Captain Scott, left the East India Company docks at London, England, recently, on another voyage to the Antarctic. Her first destination is Cape Town, where Sir Douglas Mawson, commander of the expedition will join the vessel.

Sponsored by the British, Australian and New Zealand Governments, the expedition will continue the scientific investigation of the south polar regions, begun in 1911. Sir Douglas is a noted geologist with much experience in Antarctic exploration—he was with Sir Ernest Shackleton in 1907, and led the Australian expedition of 1911-12.

Predicts Toolless Race

A prediction that man will be without tools in 500 centuries was made at Buffalo, by Dr. Albert Johnston, of Chicago, in a scientific session prior to the opening of the National Convention of Chiropractors. Hand movements and close fitting shoes are causing the loss of the arch in the foot, and for modern purposes a solid stump with a single hinge will survive, he said.

The "Horse" Men

An unknown writer sent a play to Dumas asking the dramatist to collaborate with him, Dumas wrote back in a rage, "How dare you propose to yoke together a horse and an ass?" By return post came the author's reply, "How dare you call me a horse?"

Dumas was so much impressed by this reply that he asked for the play again.

Andean artists obtained their pigments chiefly from the rocks and earth.

Fetes Wedding Day

Sixth Grandest Submarine Depth In Found Near Japan

Discovery of a vast ocean trench near Japan, more than five miles deep in one place and ranking as the sixth greatest submarine depth known to man, is welcomed by scientists as shedding increased light on the earthquake history of the region.

Centers of earthquake activity are found in the neighborhood of ocean depths. Planners generally indicate weakness in the surface crust that will give way under conditions of stress and strain.

The trough was found by scientists aboard the "Carnegie," non-military ship of the Carnegie Institute, of Washington, as they were cruising close north from Tokyo to Yokohama, Japan.

It measured 28,380 feet in depth for a distance of nine miles.

All of the six greatest depths known to man lie in the Pacific ocean. The five that are greater than the newly discovered trough are: Mariana, near the Philippines, 35,320 feet; Tuzauru, near Japan, 32,000 feet; Marianas, off Guam, 31,000 feet; Kurade, or Aldrich deep, 300 miles northeast of New Zealand, 31,000 feet; and Solomon deep, off Solomon Islands, 30,000 feet.

The greatest depths in the Atlantic ocean lie off Porto Rico and measures 20,000 feet.

Co-operative Wool Growers

Heavy Commitments Expected This Year From All the Provinces

"This is going to be a heavy commitment year for wool from all provinces," said H. J. Tisdale, of the Canadian Co-operative Wool Growers' Union, on his return from an extensive tour of the west. After a month in the principal sheep raising areas, Mr. Tisdale estimated that the total value of western shipments to the Wool Growers this year will amount to around 2,500,000 pounds, divided as follows:—British Columbia, 400,000; Alberta, 1,500,000; Saskatchewan, 600,000; and Manitoba, 300,000.

Takakaw Falls Park

The stream, which culminates in the famous Takakaw Falls in Yoho National Park, British Columbia, is fed by the melting waters of the Waputic Icefield, which lies upon the summit of the Great Divide. Flowing down the mountain for over half a mile it reaches the precipice that falls the face of the cliff. Here it takes an initial leap of 150 feet over the edge, then, gathering itself together, falls in a glorious curtain 1,000 feet deep to the face of the cliff, and finally tumbles in a magnificent cascade of 500 feet into Yoho River.

The Chinese land covers one-quarter of Asia, from the Pamir mountains to the Pacific, and from Siberia to India.

The barking of a dog can be heard at a height of four miles.

The paper made in one year would make a path a mile wide all the way around the world.

The Squire: I want you for my wife.

Village Maiden: Oh, sir!

The Squire: She needs a new parlor-maid.

An economy dish is one in which left-overs are used, or that may be prepared with inexpensive ingredients. Try the following. Even though you're wealthy, you will appreciate the first of the first.

POVERTY PUDDING

6 cups milk.

1/2 cup rice.

1/2 cup sugar.

1 teaspoon salt.

1/2 teaspoon nutmeg.

1/2 cup raisins.

Put all together in a buttered pan in a moderate oven. Stir frequently at first, and then occasionally. Bake 2 hours. Should be creamy. Better cold than hot.

British Building Motor Ships

According to the "Motor Ship" while the building of motor-driven cargo ships is not making much headway in Britain at present, this does not apply to passenger vessels or tankers. Of these vessels there are as many under construction in this country as in the rest of the world combined.

There are three hundred motor passenger liners of over 10,000 tons on the stocks in British yards at the present time.

Could Be Better

A small car collided with a motor-lorry, and as it was clearly the fault of the car driver, he said: "Well, all I can say is that I am sorry."

"Oh," said the lorry driver, "is that all you can say?"

"Yes, then, you just listen to me!"

It is said that the newspapers of the United States and Canada annually use sufficient paper to divide the world with a step 50 miles wide.

A garage to house 600 cars is being built in Bucharest.

Discover New Ocean Trough

"Yes, then, you just listen to me!"

It is said that the newspapers of the United States and Canada annually use sufficient paper to divide the world with a step 50 miles wide.

A garage to house 600 cars is being built in Bucharest.

Discover New Ocean Trough

Sixth Grandest Submarine Depth In Found Near Japan

Discovery of a vast ocean trench near Japan, more than five miles deep in one place and ranking as the sixth greatest submarine depth known to man, is welcomed by scientists as shedding increased light on the earthquake history of the region.

Centers of earthquake activity are found in the neighborhood of ocean depths. Planners generally indicate weakness in the surface crust that will give way under conditions of stress and strain.

The trough was found by scientists aboard the "Carnegie," non-military ship of the Carnegie Institute, of Washington, as they were cruising close north from Tokyo to Yokohama, Japan.

It measured 28,380 feet in depth for a distance of nine miles.

All of the six greatest depths known to man lie in the Pacific ocean. The five that are greater than the newly discovered trough are: Mariana, near the Philippines, 35,320 feet; Tuzauru, near Japan, 32,000 feet; Marianas, off Guam, 31,000 feet; Kurade, or Aldrich deep, 300 miles northeast of New Zealand, 31,000 feet; and Solomon deep, off Solomon Islands, 30,000 feet.

The greatest depths in the Atlantic ocean lie off Porto Rico and measures 20,000 feet.

Co-operative Wool Growers

Heavy Commitments Expected This Year From All the Provinces

"This is going to be a heavy commitment year for wool from all provinces," said H. J. Tisdale, of the Canadian Co-operative Wool Growers' Union, on his return from an extensive tour of the west. After a month in the principal sheep raising areas, Mr. Tisdale estimated that the total value of western shipments to the Wool Growers this year will amount to around 2,500,000 pounds, divided as follows:—British Columbia, 400,000; Alberta, 1,500,000; Saskatchewan, 600,000; and Manitoba, 300,000.

Takakaw Falls Park

The stream, which culminates in the famous Takakaw Falls in Yoho National Park, British Columbia, is fed by the melting waters of the Waputic Icefield, which lies upon the summit of the Great Divide. Flowing down the mountain for over half a mile it reaches the precipice that falls the face of the cliff. Here it takes an initial leap of 150 feet over the edge, then, gathering itself together, falls in a glorious curtain 1,000 feet deep to the face of the cliff, and finally tumbles in a magnificent cascade of 500 feet into Yoho River.

The Chinese land covers one-quarter of Asia, from the Pamir mountains to the Pacific, and from Siberia to India.

The barking of a dog can be heard at a height of four miles.

The paper made in one year would make a path a mile wide all the way around the world.

The Squire: I want you for my wife.

Village Maiden: Oh, sir!

The Squire: She needs a new parlor-maid.

An economy dish is one in which left-overs are used, or that may be prepared with inexpensive ingredients. Try the following. Even though you're wealthy, you will appreciate the first of the first.

POVERTY PUDDING

6 cups milk.

1/2 cup rice.

1/2 cup sugar.

1 teaspoon salt.

1/2 teaspoon nutmeg.

1/2 cup raisins.

Put all together in a buttered pan in a moderate oven. Stir frequently at first, and then occasionally. Bake 2 hours. Should be creamy. Better cold than hot.

British Building Motor Ships

According to the "Motor Ship" while the building of motor-driven cargo ships is not making much headway in Britain at present, this does not apply to passenger vessels or tankers. Of these vessels there are as many under construction in this country as in the rest of the world combined.

There are three hundred motor passenger liners of over 10,000 tons on the stocks in British yards at the present time.

Could Be Better

A small car collided with a motor-lorry, and as it was clearly the fault of the car driver, he said: "Well, all I can say is that I am sorry."

"Oh," said the lorry driver, "is that all you can say?"

"Yes, then, you just listen to me!"

It is said that the newspapers of the United States and Canada annually use sufficient paper to divide the world with a step 50 miles wide.

A garage to house 600 cars is being built in Bucharest.

Train Britishers

Plan To Bring Ten Thousand English Children To Canada Every Year

A scheme whereby ten thousand English children would be brought to Canada every year, after being educated and trained for farming life, and on which the London County Council would probably pronounce itself, was outlined by Lieut-Col. John Dodge, of the London County Council, in an interview at Montreal.

A daughter was born to Mr. and Mrs. F. Bertschy, of Majorville, at the Bassano Hospital on Wednesday, August 14th.

FLOWER SERVICE

A special Flower Service will be held in Knox Presbyterian Church at 11 o'clock Sunday morning, Aug. 25th. Rev. P. C. McCrae will speak on the subject, "The Message of the Flowers."

An English guard took the place of a Welsh guard on a train. The names of the towns in Wales are mostly consonants and unbelievably long. The English guard's business was to announce the names of the towns as the train stopped at the stations.

At the first stop he managed to make a stagger at the name of a town printed on the front of the station. The name of the next town was considerably longer, and the guard hesitated before he finally managed to say something. But the name of the third town went clean across the front of the station, and had in it nearly every consonant in the alphabet.

The guard looked at it in despair, opened the door of the first compartment, and said out: "If there's anybody in there for 'ere, 'ere it is!"

Announcement

H. D. BACON wishes to announce to the people of Bassano and district that he has taken the agency for the Patmore Nurseries, of Brandon, Manitoba.

"Our goods are the best, and our prices are the lowest in Western Canada today. We have a wonderful catalogue; ask to see it. Everything from Bulbs to Apple Trees."

"Fall planting is strongly recommended for the west, so order your trees and plants early. Goods shipped in first class condition."

For information, a postcard will bring it to you, or phone 129, Bassano.
